

Justin Posey's Public Statements on the "Beyond the Map's Edge" Treasure Hunt

1. Introduction

This report compiles and analyzes the public statements made by Justin M. Posey regarding the treasure hunt associated with his book, *Beyond the Map's Edge*, and his appearance in the Netflix documentary series, *Gold & Greed: The Hunt for Fenn's Treasure*. Following the conclusion of the famed Forrest Fenn treasure hunt, in which Posey was an active participant, he initiated his own challenge, embedding clues within his published works and media appearances.

Justin Posey, identified as a technologist based in Texas, gained public visibility through his involvement in the decade-long search for Forrest Fenn's hidden treasure, an endeavor chronicled in the Netflix series *Gold & Greed*. The Fenn treasure, reportedly worth over \$1 million, was found in Wyoming in June 2020 by Jonathan 'Jack' Stuef. Posey, who dedicated significant time and resources to the Fenn chase, subsequently announced the launch of his own hunt, hiding a collection of valuable artifacts and providing clues through various channels.

The scope of this report is confined to synthesizing direct comments, clarifications, and statements attributed to Justin Posey found within publicly available sources, including interviews, his official website, book promotional materials, and media coverage related to the Netflix series.

It specifically examines Posey's remarks concerning the creation and inspiration behind his hunt, explanations or guidance regarding the clues, updates on the treasure's status, and his stated intentions or philosophy underpinning the venture. Speculation or theories from third parties are excluded unless directly analyzing a statement made by Posey.

This document will proceed by identifying the primary works associated with the hunt (Posey's book and the Netflix series), exploring the origins and motivations behind the treasure hunt's creation, dissecting Posey's guidance on the clues and hunt parameters, detailing the described contents of the hidden treasure, providing updates on the hunt's status based on Posey's communications, examining his stated intentions, and concluding with a synthesis of his public posture regarding the *Beyond the Map's Edge* treasure hunt.

2. Identifying the Core Works: Book and Series

Justin Posey utilized two primary platforms for the launch and dissemination of clues related to his treasure hunt: his memoir and his featured appearance in a Netflix documentary series.

Book Identification: The central literary work is Posey's memoir, titled *Beyond the Map's Edge*. Published under the imprint "Beyond the Map" on March 27, 2025, the hardcover edition comprises 236 pages. The book chronicles Posey's experiences during his obsessive,

decade-long search for the Forrest Fenn treasure, delves into his family background where treasure hunting was a common topic, and reflects on his personal journey of self-discovery through the pursuit. Crucially, promotional materials and descriptions explicitly state that the book contains hints related to a *new* treasure hidden by Posey himself. A poem included within the book serves as the first major clue for this new hunt. Associated with the book and hunt is an official author website, <https://treasure.quest>.

Netflix Series Identification: Posey is prominently featured in the Netflix documentary series *Gold & Greed: The Hunt for Fenn's Treasure*. The three-part series details the story of the Fenn treasure hunt, profiling various searchers, including Posey, and exploring the motivations, obsessions, and dangers associated with the quest. Posey appears as a treasure hunter sharing his unique approach, which involved merging technological expertise with outdoor skills. The series served as a critical launchpad for Posey's own hunt. During the filming, Posey informed a producer that he had embedded clues for his *own* planned treasure hunt within the interview setting and other areas filmed in his house. This was later confirmed by Posey in interviews after the series aired.

The simultaneous release of the book and the Netflix series, both containing elements related to Posey's treasure hunt, indicates a deliberate and integrated multi-platform strategy. Posey leveraged both his personal narrative (the memoir) and his wider public exposure (the Netflix feature) to introduce and provide pathways into his own treasure challenge, creating a complex, layered experience designed to engage participants across different media. This was not an incidental development but a planned approach to maximize the hunt's visibility and complexity from its inception.

3. The Genesis of the Hunt: Inspiration and Creation

The creation of the *Beyond the Map's Edge* treasure hunt is rooted in Justin Posey's deep immersion in the Forrest Fenn treasure phenomenon, combined with personal motivations and familial history.

Inspiration from Forrest Fenn: Posey admits to being "captivated (i.e. obsessed)" with the Fenn treasure for the better part of a decade. His interest began with childhood stories of lost gold and evolved into a pursuit merging technology with adventure. Posey has stated that during his search for Fenn's treasure, he believes he was extremely close to its location in Yellowstone, possibly within 10-15 feet, but missed it. This near-miss, coupled with the eventual discovery of the treasure by Jack Stuef, appears to have significantly impacted Posey. When Stuef decided to auction the Fenn treasure contents, Posey attempted to purchase the entire collection, reportedly making a substantial offer (\$1.3 million mentioned in one source) with the explicit intention of re-hiding it to continue the chase. Although the deal for the complete lot fell through, Posey successfully acquired several significant pieces from the auction.

Personal and Familial Motivations: Posey's background includes a family environment where treasure hunting was a normalized part of life and conversation. His grandfather was reportedly a fish-and-game warden in Montana, where Posey spent summers exploring , although one discussion forum participant noted an obituary stating his grandfather was a lifetime resident of New Mexico. Posey has explicitly stated that he hid his treasure in memory of his late grandfather, his late father, his late brother, and his dog, Tucker. This dedication imbues the hunt with a profound personal significance, distinguishing it from a purely game-oriented endeavor. His professional background as a technologist, applying complex problem-solving

skills to modern treasure hunts, also informs the hunt's creation. In his book, Posey mentions the treasure is hidden "in a place that's dear to my heart" and "surrounded by significance", reinforcing the personal connection.

The Act of Hiding: Following his partial acquisition of Fenn artifacts, Posey proceeded with his plan to hide a treasure, albeit with modifications since he didn't obtain the entire Fenn collection. He combined the Fenn pieces he acquired with his own collection of artifacts and valuables. Discussions suggest Posey undertook multiple trips to hide the treasure, potentially involving travel designed to obscure the final location. One source specifically mentions four trips being stated by Posey. He also reportedly aimed to leave no digital footprint of the journey to the hiding spot.

Posey's treasure hunt emerges not as a simple replica of Fenn's, but as a direct successor shaped by his intense personal engagement with the original chase. His near-miss experience, the attempt to acquire and continue Fenn's legacy directly, and the eventual creation of a new hunt using *parts* of Fenn's treasure blended with his own items demonstrate a clear lineage. However, the act of dedicating the hunt to deceased family members transforms it into a deeply personal memorial and tribute. This significant emotional investment suggests that the choice of location or the themes embedded within the clues might be linked to these personal connections, potentially offering layers of meaning beyond straightforward geographical puzzles. The location being "dear to his heart" and "surrounded by significance" further supports this interpretation.

4. Dissecting the Clues: Posey's Guidance and Clarifications

Justin Posey has provided numerous statements regarding the structure, nature, and parameters of the clues for the *Beyond the Map's Edge* treasure hunt, disseminated through interviews, his website, and media appearances.

The Poem as the Primary Key: Posey has unequivocally stated that the poem titled "Beyond The Map's Edge" is the fundamental key to solving his treasure hunt. While other elements like the book narrative, clues potentially hidden in the Netflix series, and information on his website are intended to *assist* searchers, the poem itself is paramount. The full text of the poem has been made publicly available, both within the *Beyond the Map's Edge* book and freely accessible on Posey's official website, <https://treasure.quest>.

Number, Order, and Nature of Clues: Posey has specified that the poem contains "(at least) 10 clues". The qualifier "at least" suggests that some lines or sentences within the poem might harbor more than one piece of critical information. He confirmed that these clues must be solved in "consecutive order," forming a "trail of breadcrumbs" that progressively leads the searcher towards the treasure. Furthermore, Posey asserted that these clues, when correctly deciphered and followed sequentially, lead to the "exact location" of the hidden treasure. To avoid ambiguity encountered in previous hunts, Posey clarified that there is "No difference between a clue and a hint. They are the same", and explicitly stated that there are "no red herrings" designed to mislead searchers.

Clues/Hints in "Gold & Greed": A significant aspect of Posey's hunt launch involved his claim of embedding clues within the Netflix series *Gold & Greed*. He stated directly, both on-camera to a producer and in subsequent interviews, that he intentionally placed clues related to his own treasure within the interview setup and other spaces filmed at his home. He confirmed to *The Hollywood Reporter* that this decision was made "pretty early" in the documentary's production

process. To ensure fairness and prevent production staff from gaining an advantage, Posey withheld details about the treasure until the last minute, sending a self-shot video describing it to Netflix just before the series' release. Despite uncertainty expressed by Netflix and the series director about whether these intended clues made the final edit, Posey stated he felt "confident" they did. Crucially, Posey linked the two primary sources, stating that hints within the Netflix series "guide you in the book", suggesting the visual elements are meant to aid interpretation of the written materials. While numerous online discussions and articles speculate about specific visual elements in the series being clues (such as clock times, screen wallpapers, items on desks, or a safe combination), Posey himself has not publicly confirmed these specific interpretations according to the available materials.

Book and Website Clues: Beyond the central poem, Posey indicated that additional hints are "scattered throughout" the pages of his memoir, *Beyond the Map's Edge*. He also revealed that there are "intentional differences" between the hardcover and digital (ebook) versions of the book, and these differences "may hold some insights" for searchers. The official website (<https://treasure.quest>) serves as a hub, providing the poem and potentially hosting updates or further clarifications. Posey has clarified that there are no hidden messages embedded within the website's source code. He also addressed apparent errors on the website, such as a missing state capital on a map graphic or misspellings, confirming these were accidental and hold no intentional meaning for the hunt.

Specific Clarifications & Parameters: Through interviews and Q&A sessions, Posey provided several specific parameters for the hunt:

- **Location:** The treasure is hidden somewhere in the "American West". The map on his website includes Alaska, fueling speculation, but Posey has not publicly confirmed or denied specific states beyond the broad "West" designation. Community discussions mention potential links to Montana (where he reportedly owns property and his grandfather worked) or New Mexico (mentioned in an obituary for his grandfather), but these remain unconfirmed by Posey in the provided sources. His statement that the location is "dear to my heart" remains a key personal clue.
- **Accessibility:** The location is accessible 24 hours a day, 7 days a week, and requires no fee for access. This parameter likely excludes locations such as National Parks that charge entrance fees or have restricted access hours, which have been subjects of speculation.
- **Proximity/Effort:** Posey stated, "You don't need to hike a great distance. You don't need to hike more than a mile to figure out where the treasure is at".
- **Nature of Location:** The treasure is not associated with any man-made structure. He emphasized that it is not in a dangerous area and does not require dangerous water crossings.
- **Knowledge Needed:** No specialized knowledge (e.g., technical expertise, obscure history) is required to solve the poem.
- **Verification:** A significant feature mentioned by Posey is the existence of a "checkpoint" along the clue path. He stated, "There is a checkpoint that will give you zero doubt that you are trending in the right direction".
- **Poem Interpretation Approach:** Regarding the final stanza of the poem ("Truth rests not in clever minds..."), Posey indicated it serves as guidance on *how* to approach the solve, suggesting intuition and straightforward thinking are more valuable than overly complex or "tangled, twisted" interpretations.

Summary Table: Justin Posey's Statements on Clue Mechanics & Hunt Parameters

Parameter	Posey's Statement (Direct Quote or Summary)	Source Snippet ID(s)
Primary Key	The poem "Beyond The Map's Edge" is the key; other elements assist.	
Number of Clues	"(at least) 10 clues" in the poem.	
Order of Clues	Clues are in "consecutive order"; form a "trail of breadcrumbs".	
Clue Outcome	Clues lead to the "exact location" of the treasure.	
Clue vs. Hint	"No difference between a clue and a hint. They are the same."	
Red Herrings	"No red herrings."	
Netflix Clues	Intentionally hid clues in Netflix filming setup; hints guide interpretation of the book.	
Book Clues	Hints scattered throughout the book; intentional differences between print/digital versions may hold insights.	
Website Clues	No hidden messages in website code; map/spelling errors unintentional.	
Location Area	Somewhere in the "American West"; "in a place that's dear to my heart".	
Location Accessibility	Accessible 24/7, no fee required.	
Hiking Distance	"don't need to hike more than a mile to figure out where the treasure is at."	
Location Type	Not associated with any structure; not in a dangerous area; no dangerous water crossings.	
Knowledge Required	No specialized knowledge needed.	
Verification Point	"There is a checkpoint that will give you zero doubt that you are trending in the right direction."	
Interpretation Style	Final stanza advises intuition over complexity; "What you seek, you already know."	

Many of Posey's clarifications appear deliberately designed to address common frustrations and dangers associated with the Forrest Fenn treasure hunt. Fenn's hunt was marred by ambiguity and, tragically, the deaths of some searchers in hazardous terrain. Posey's explicit statements ruling out dangerous areas, dangerous water crossings, and association with structures, along with confirming 24/7 fee-free access, suggest an effort to create a safer and more accessible hunt. The introduction of a "checkpoint" directly counters the uncertainty many Fenn searchers experienced, offering a mechanism for verifying progress. Clarifying the equivalence of "clue" and "hint" and denying the presence of red herrings further points towards an intention of fairness and directness in the puzzle's construction.

Furthermore, Posey's phrasing regarding the hiking distance – needing to hike no more than a mile "to figure out where the treasure is at", rather than "to find the treasure" – combined with the clues leading to the "exact location", subtly implies a potential final step. The mile hike may lead searchers to the immediate vicinity (perhaps the checkpoint) from which the precise hiding spot must be identified through close observation or interpretation of a final instruction derived from the poem, rather than the treasure simply resting at the terminus of the hike. This suggests the final discovery might require keen "boots on the ground" observation after the main navigational clues are solved.

5. The Treasure Itself: Contents and Container

Justin Posey has provided relatively detailed descriptions of the container holding the treasure and its contents, emphasizing its significant weight and diverse composition.

Container: The treasure is reportedly hidden inside a Saddleback Leather 16-inch Grandfather briefcase.

Weight: The total weight of the briefcase and its contents is stated to be approximately 60 pounds.

Contents: Based on Posey's public statements and descriptions found in promotional materials for his book and interviews surrounding the Netflix series, the treasure includes a mix of precious metals, gemstones, historical artifacts, items from the original Fenn treasure, and unique modern elements:

- **Gold:** Various forms of gold are included, specified as PAMP Suisse kilogram bars, gold flakes, gold dust, and gold coins from different global origins and historical periods.
- **Gemstones:** The cache contains precious gemstones, described as "large loose emeralds, rubies, and deep purple amethysts".
- **Fenn Items:** Posey confirmed that the treasure includes significant pieces he acquired from the Forrest Fenn treasure auction. He specifically mentioned the inclusion of a jewel-encrusted dragon bracelet from Fenn's collection.
- **Historical Artifacts:** The collection spans considerable historical breadth, with artifacts reportedly dating from the 3rd century Kushan Dynasty, the Crusades, the Byzantine Empire, and the Persian Shi'ite Buyid Dynasty. Posey highlighted the inclusion of "one of the oldest coins ever made by man during the Lydian empire around 561 BC".
- **Unique Items:** Among other special pieces, Posey listed a large meteorite or "rock from

outer space" as part of the treasure.

- **Cryptocurrency:** A distinctly modern component is a Bitcoin wallet, described as a "cryptocurrency component that grows with book sales".

Value: While Posey himself has avoided placing a precise dollar figure on the treasure, stating simply that "whoever finds it will not be disappointed", external sources and community discussions often cite estimates ranging from over \$1 million up to potentially \$5 million, likely based on the described contents.

The inclusion of a cryptocurrency element tied directly to the sales of the *Beyond the Map's Edge* book introduces a novel, dynamic aspect to the treasure's value. Unlike the relatively fixed (though market-dependent) value of traditional treasure components like gold and artifacts, the Bitcoin wallet's value is designed to potentially increase as interest in the hunt (and corresponding book sales) grows. This creates a self-reinforcing mechanism where the hunt's popularity could directly enhance the financial reward, blending old-world artifact hunting with contemporary digital assets and integrated marketing.

6. Hunt Status Updates

Consistent communication regarding whether the main prize remains hidden is crucial for maintaining engagement and trust within a treasure hunting community. Based on the available information, Justin Posey has provided at least one definitive update on the status of the *Beyond the Map's Edge* treasure.

Confirmation of Non-Discovery: On March 28, 2025, shortly after the hunt's launch coinciding with the book release and Netflix series premiere, Posey responded to a query on the social media platform X (formerly Twitter). When asked if the treasure had been discovered, he replied unequivocally, "The treasure has NOT been found!". No subsequent updates confirming or denying a find were present in the reviewed materials.

Ongoing Nature: Posey's official website, <https://treasure.quest>, includes language encouraging visitors to "Check back frequently". This implies an intention to maintain the site as a source of information and potentially provide future updates, hints, or clarifications as the hunt progresses.

Posey's willingness to provide a direct status update via social media early in the hunt suggests an awareness of the importance of such communication, potentially informed by his own experience as a searcher in the Fenn community. Maintaining clarity on whether the treasure is still available is vital for sustaining searcher motivation and managing expectations over the potentially long duration of the hunt.

7. Intentions and Philosophy

Justin Posey's public statements and the framing of his treasure hunt reveal several underlying intentions and a distinct philosophy guiding its creation and execution.

Paying Tribute and Continuing Adventure: A primary stated motivation is personal tribute; the

hunt is explicitly dedicated to the memory of his late grandfather, father, brother, and dog Tucker. Beyond personal memorial, Posey has framed the hunt as a way of "paying it forward" the sense of adventure and community that Forrest Fenn fostered. It represents a continuation of the spirit of the chase that captivated him for years.

Merging Technology and Tradition: Posey's approach reflects his background as a technologist. During his pursuit of Fenn's treasure, he employed unconventional methods like writing algorithms to analyze facial micro-expressions from Fenn's interviews. His own hunt integrates traditional elements (physical treasure, poem, book) with modern components (cryptocurrency, website, leveraging a Netflix documentary launch).

Emphasis on the Journey: While the treasure itself is substantial, the narrative surrounding the hunt, particularly in the book descriptions, echoes sentiments often associated with Forrest Fenn – emphasizing the intrinsic value of the adventure, the process of self-discovery, and the experiences gained along the way, regardless of finding the final prize. The director of *Gold & Greed* noted that the Fenn hunt experience ultimately changed the lives of participants like Posey for the better, highlighting the journey's importance.

Approach to Clues and Fairness: As detailed in Section 4, Posey's clarifications regarding clue mechanics (consecutive order, no red herrings, clue/hint equivalence) and hunt parameters (safety, accessibility, verification checkpoint) suggest an intention to create a challenging but fundamentally fair and safer hunt than its predecessor. His guidance on interpreting the final stanza – favoring intuition over excessive complexity – further shapes the intended approach for searchers.

Community Engagement: Posey has demonstrated a willingness to engage with the treasure hunting community through various channels. He has participated in multiple interviews on platforms like YouTube and podcasts, answered questions, and provided clarifications. He maintains an official website as a central information point and uses social media for updates.

Considered together, these elements indicate that Posey is consciously positioning the *Beyond the Map's Edge* hunt as both an homage to Forrest Fenn and a deliberate evolution of the modern treasure hunt model. He adopts core elements like the poem-centric structure and the allure of physical treasure, incorporating actual pieces from Fenn's collection as a direct link. However, he simultaneously introduces innovations like the dynamic cryptocurrency component, provides more explicit operational parameters aimed at safety and clarity, strategically utilizes multiple modern media platforms for the launch and potential clue dissemination, and anchors the entire endeavor in deeply personal motivations. This suggests an effort to learn from the Fenn experience, refine the mechanics, and create a hunt that reflects his own values, technological background, and personal history.

8. Synthesis and Conclusion

Justin Posey has publicly established a multi-faceted treasure hunt, *Beyond the Map's Edge*, leveraging his personal history with the Forrest Fenn treasure, his memoir, and his appearance in the Netflix series *Gold & Greed*. His direct statements confirm the hunt's existence, the nature of its primary components, and specific operational parameters designed to guide searchers.

Key Confirmed Findings from Posey:

- **Core Works:** The hunt is anchored by the poem found in his book *Beyond the Map's Edge* and on his website <https://treasure.quest>. The book itself contains additional hints, and clues were intentionally embedded within his segments of the *Gold & Greed* Netflix series, intended to guide interpretation of the book.
- **Treasure:** A 60-pound collection in a leather briefcase, containing gold, gems, historical artifacts, pieces from Fenn's treasure (including a dragon bracelet), a meteorite, and a Bitcoin wallet tied to book sales, is hidden somewhere in the American West.
- **Clues:** The poem contains at least 10 clues in consecutive order that lead to the exact location. There are no red herrings, and clues and hints are synonymous.
- **Parameters:** The location is accessible 24/7 without a fee, not associated with a structure, not in a dangerous area, and requires hiking less than a mile to "figure out where" it is. A "checkpoint" exists for verification. No specialized knowledge is needed.
- **Status:** As of March 28, 2025, Posey confirmed the treasure had not been found.
- **Intent:** The hunt serves as a personal tribute to family members and aims to "pay forward" the spirit of adventure inspired by Fenn, incorporating lessons learned and blending traditional elements with modern technology and communication.

Communication Strategy: Posey has adopted a relatively open communication strategy compared to his predecessor. He actively participates in interviews across various platforms, maintains an official website for core information (including clarifications about errors), and utilizes social media for status updates. This approach appears designed to manage expectations and provide a clearer framework for participants.

Distinction from Speculation: It is essential to distinguish between information directly stated by Justin Posey and the extensive body of speculation and theory generated by the searcher community. While discussions about specific locations (Alaska, Yosemite, Moab, Montana, etc.) or interpretations of visual cues in the Netflix series are prevalent online, these remain unconfirmed theories unless explicitly validated by Posey. This report has focused solely on synthesizing the information attributed directly to him from the provided source materials. In conclusion, Justin Posey has successfully launched a significant new armchair treasure hunt, building upon the legacy of Forrest Fenn while introducing his own personal motivations, technological inclinations, and refined parameters. His public statements provide a foundational framework for the hunt, outlining the key tools (poem, book, Netflix hints), the nature of the prize, and the rules of engagement. While the ultimate solution remains elusive, Posey's communications indicate an ongoing commitment to the hunt and its community, ensuring the continuation of the modern treasure hunting phenomenon for a new generation of adventurers. As per his last update, the treasure remains hidden, awaiting discovery somewhere "Beyond the Map's Edge."
